📁 PROFESSIONAL EXPERIENCE

Computer Specialist, System administrator, cyber security, IT project manager

I am an expert in guaranteeing the smooth operation, security, and strategic development of IT infrastructures thanks to my broad skill set that includes system administration, cybersecurity analysis, and IT project management. Capable of overseeing intricate systems, carrying out comprehensive risk evaluations, and directing interdisciplinary groups, I utilize my robust leadership skills and technical know-how to stimulate creativity, minimize hazards, and accomplish fruitful IT initiatives punctually and economically. I am dedicated to upholding the highest standards of efficiency, security, and stakeholder satisfaction, and I constantly adjust to new challenges and emerging technology to produce the best possible outcomes.

🎓 EDUCATION

2022 September –
2026 December
Nairobi, Kenya

Degree in computer science, Machakos university

I am aiming in receiving my degree in computer science with a focus on artificial intelligence, web development, software engineering, cyber security, and computer specialists from Machakos University, where I also gained extensive knowledge and expertise in the majority of computer-related fields. My goal is to graduate from university with information technology skills fully knowing the subject while showcasing my commitment to both lifetime learning and academic success.
